

After doing further research, I have put together a list of residual or space sprays that are listed in the Chinese translated document (attached). My previous email suggested considering Conquer and Shockwave, and even though they are pyrethroids, they aren't on the list. So, after doing a search on products that are on the list, and have label directions allowing for this type of application, I have come up with this list of US registered products:

Surface Sprays:

- Cypermethrin (Demon)
- Cyfluthrin (Tempo)
- Deltamethrin (check the label directions for proper sites of applications)
- Cyhalothrin (Lambdastar, Cyhalocap, Demand)

Space Spray (Fogging Insecticides):

- Cyfluthrin (Pro-Control Plus Total Release Aerosol)
- Permethrin (Sector Misting Concentrate, others brands are registered and available)
