# U.S. Freight Forwarding Compensation (FFC) Change

**We would like to let you know that effective on October 1, 2017, we will reduce the Freight Forwarding Compensation (FFC) filed in our U.S. export tariffs from 1.25% to 0%. As a result, we will no longer pay Freight Forwarding Compensation on U.S. export shipments.**

We encourage customers and their agents to use the electronic tools available for all booking & documentation activities. These tools have improved considerably over time, significantly reducing the work required to manage core processes associated with the commission.
